adding**technology**®
in your business

Build a financial foundation as solid as your projects

About Us

At adding technology, inc., we understand that contractors want to focus on what they do best: building and creating. Managing financial compliance and bookkeeping can be a major distraction. We specialize in providing proactive back-office support with financial expertise tailored to the construction industry.

We recognize the challenges contractors face, from messy books and lack of real-time financial visibility to compliance stress. These issues can hinder the creative process and quality of work. That's why we're here to help. We're not just accountants; we're part of your crew. We renovate your books, implement cutting-edge technology, and offer real-time job costing and financial insights, enabling you to make informed decisions.
